TELESCOPIC RAKE

HAND TOOLS - RAKE

Armstrong Snow Shovel. Simple one-touch snap-on patent. Lightweight and 10x stronger polycarbonate. Solid multi-rib construction. Deep and wide shovel was designed for speed and greater volume of snow dumped. Non-stick surface due to the properties of polycarbonate, snow slides easily while working and does not stick to the shovel, increasing speed and comfort. Komaxit- protective coating of the rods are powder coated. This is an advanced method of applying electrostatically sprayed particles to aluminium to achieve a durable protective layer with an aesthetic appearance. The result is a uniform, durable and high quality paint finish. Surfaces resist chipping and scratching and do not fade. Colours stay bright longer and the lacquer layer protects your hands against frost
