### SIX-STRAND ROPE - 6X37M - FC / ZINC PLATED

STEEL ROPES IN YARDAGE

Six-strand steel rope wound in the classic way with a large number of wires (6 x 37 = 222 wires) of smaller diameters. The rope has a lower abrasion resistance compared to ropes with fewer wires. Complies with EN 12385-4 and DIN 3060. The inner tube is made of fibres. The great advantage is the high flexibility of the rope. The rope is used where there is a high requirement for flexibility. It is suitable for pulleys and small diameter drums. It is used for suspension ropes, lift ropes, as excavator ropes, crane ropes, ship ropes, etc.

Rope diameter: 10 mm, 11,2 mm, 12 mm, 14 mm, 16 mm, 18 mm, 20 mm

### STAINLESS STEEL ROPE A4(7X19)

STEEL ROPES IN YARDAGE

Stainless steel rope construction (7x19) has 7 strands of 19 wires. The rope soul is also made of Aisi 316 stainless steel. The number of wires in the rope is 133 (6x19 + 1x19 soul). The rope is moderately flexible, therefore it can withstand bends over medium diameter pulleys. It is used as a tensioning rope, carrying rope, gates and anchoring rope, for aircraft construction, road machinery, railing fillers and for architecture. If you are looking for a rope that will make a beautiful design accessory, this type is the best choice.

Rope diameter: 3 mm, 4 mm, 5 mm, 6 mm, 8 mm

### SIX-STRAND ROPE 6X19M - FC / ZINC PLATED

STEEL ROPES IN YARDAGE

Six-strand steel rope wound in the classic way with a medium number of wires (6 x 19 = 114 wires) of medium diameters. The rope has good abrasion resistance. Complies with EN 12385-4 and DIN 3060. The inner tube is made of textile fibres. Medium rope flexibility requires pulleys and drums of medium diameters. This rope provides an excellent balance between flexibility and durability. Use for shunting, mounting, ski lifts, signal, gates, for anchoring, etc.

Rope diameter: 4 mm, 5 mm, 6 mm, 8 mm

### PVC COATED ROPES

STEEL ROPES IN YARDAGE

The galvanized wire rope with PVC sheath is protected from external influences and at the same time the material is protected from being cut through the rope. The base consists of a six-strand steel rope wound in the classic way with a small number of wires (6 x 7 = 42 wires) of relatively larger diameters. They are used for example for tarpaulins, advertising banners, nets or inflatable halls.

Diameter: 2/3, 3/4, 4/5, 5/6

## STAINLESS STEEL ROPE A4 (7X7)

STEEL ROPES IN YARDAGE

Stainless steel rope of 6x7-WSC construction has 7 strands of 7 wires. The number of wires in the rope is 49 (6x7 + 1x7 soul). The rope is less flexible, therefore it is suitable for larger diameter pulleys. It consists of thicker wires, therefore it has high abrasion resistance. It is used for shunting, mounting, ski lifts, signal, gates for anchoring, etc. It is also suitable as a decorative rope, e.g. as a filler for railings.

Rope diameter: 1 mm, 1,5 mm, 2 mm, 2,5 mm, 3 mm, 4 mm, 5 mm, 6 mm, 8 mm

## SIX-STRAND ROPE - 6X7 - FC / ZINC PLATED

STEEL ROPES IN YARDAGE

Six-strand steel rope wound in the classic way with a small number of wires (6 x 7 = 42 wires) of relatively larger diameters. The rope has very good abrasion resistance. It complies with EN 12385-4 and DIN 3055. The inner tube is made of textile fibres. The low flexibility of the rope requires pulleys and drums of larger diameters. Use for shunting, assembly, ski lifts, signal, gates, for anchoring, etc.

Rope diameter: 1 mm, 1,6 mm, 2 mm, 2,5 mm, 3 mm
