PIRANA LONGA 23.5HP ON THE CHASSIS

SP/SPA/06

Technical parameters

● Length	3,5 mm
● Width	1,8 mm
● Height	2,2 mm
● Weight	440 kg
● Cutting mechanism	two-way auger
● Maximal crushed material diameter	max 7 cm
● Chip length (not adjustable)	log length 15 cm
● Power	5 m3/hour
● Chassis	Cart with large technical certificate
● Platform hinge	Yes - ISO 50
● Wood chips output	Output blow
● Emergency brake	Yes
● Engine	Kohler CH730
● Power	23,5HP - 3600 RPM
● Fuel	Natural 95 (petrol)
● Tank volume	16 l

Machine equipment is designed for crushing branches, wood and wood waste, using two-way self-feeding cutting screw. The high performance of the machine is provided by the KOHLER petrol engine of 23Hp, which is by robust pulley geared to slow, to force. The machine has automatic feeder. The wood chipper takes branches with leaves, needles, branched, dry, wet, and takes also boards and beams.

The machine is on chassis with towing hitch connection with a large technical license and the possibility of granting a license plate. Homologations for road traffic. When crushed, the branches are inserted into the red hopper and the chips are blown to the ground or to the crate. that can be attached to the chipper. Into the bag with a chimney (accessory).

The receiving hopper for inserting of branches is equipped with safety brake. When it is pressed, the brake is stuck into the inserted material and the feeder is stopped.

The final chip is suitable for heating in a boiler or fireplace, soil fixing and possibly for other purposes. The chip is asymmetrical and airy, so beautifully swells, does not mould and its calorific value is very high.

PIRANA LONGA 23.5HP WHEELS 410X160

SP/SPA/05

Technical parameters

● Length	230 cm
● Width (Transport position)	120 cm
● Height (Transport position)	210 cm
● Weight	320 kg
● Cutting mechanism	two-way auger
● Maximal crushed material diameter	max 7 cm
● Chip length (not adjustable)	log length 15 cm
● Power	5 m3/hour
● Chassis	off-road arrow tyres 410x160
● Platform hinge	Yes - ISO 50
● Wood chips output	Output blow
● Emergency brake	Yes
● Engine	Kohler CH730
● Power	23,5HP - 3600 RPM
● Fuel	Natural 95 (petrol)
● Tank volume	15 l

Machine equipment is designed for crushing branches, wood and wood waste, using two-way self-feeding cutting screw. The high performance of the machine is provided by the KOHLER petrol engine of 23.5Hp, which is by robust pulley geared to slow, to force. The machine has automatic feeder. The wood chipper takes branches with leaves, needles, branched, dry, wet, and takes also boards and beams.

The machine is with off-road modification. Equipped with off-road arrow wheels 410x160mm, with the towing hitch connection. When crushed, the branches are inserted into the red hopper and the chips are blown to the ground or to the crate. Into the bag by chimney(accessory).

The receiving hopper for inserting of branches is equipped with safety brake. When it is pressed, the brake is stucked into the inserted material and the feeder is stopped.

The final chip is suitable for heating in a boiler or fireplace, soil fixing and possibly for other purposes. The chip is asymmetrical and airy, so beautifully swells, does not mould and its calorific value is very high.

PIRBA WITH TROLLEY CONNECTION

SP/TRA/06

Machine equipment is designed for crushing branches, wood and wood waste, using two-way self-feeding cutting screw. The machine has automatic feeder and all functions are turned on mechanically. Required tractor power from 20 kW and more. The wood block chipper takes branches with leaves, needles, branched, dry, wet, and takes also boards and beams.

Technical parameters

● Length	x m
● Width	x m
● Height	x m
● Weight	360 kg
● Cutting mechanism	two-way auger
● Maximal crushed material diameter	max. 10 cm
● Chip length (not adjustable)	Chip length 17 cm
● Power	7 m3/hour
● Wood chips output	Output blow
● Platform hinge	Yes
● Emergency brake	Yes
● Tractor power from	20 kW
● Cardan RPM	540 RMP
● Hinge type	I a II - as specified by the customer
● the cardan shaft isn't inclusive	

Connection to the three-point hitch of the tractor according to customer's specifications. When crushing the branches are inserted from a side the tractor and chips are blown behind the tractor. The chip is blown by the chimney to the ground or to the crate. Into the bag by bagging chimney(accessory).

The final chip is suitable for heating in a boiler or fireplace, soil fixing and possibly for other purposes. The chip is asymmetrical and airy, so beautifully swells, does not mould and its calorific value is very high.

PIRBA LONGA 11KW

SP/ELE/02

Machine equipment is designed for crushing branches, wood and wood waste, using two-way self-feeding cutting screw. High performance is provided by an 11 kW electric motor. The machine has automatic feeder. The wood chipper takes branches with leaves, needles, branched, dry, wet, and takes also boards and beams.

Technical parameters

● Length	x mm
● Width	x mm
● Height	x mm
● Weight	450 kg
● Cutting mechanism	two-way auger
● Maximal crushed material diameter	max 10 cm
● Chip length (not adjustable)	log length 17 cm
● Wood chips output	Without blowing
● Power	5 m3/hour
● Emergency brake	Yes
● Chassis	for manual movement
● El. engine	11kW /3000 RPM

The machine is on 410x100mm off-road wheels. When crushing the branches are inserted into the hopper and the chip is blown on the ground or to the bag, which can be hooked on the chipper.

The receiving hopper for inserting of branches is equipped with safety brake. When it is pressed, the brake is stucked into the inserted material and the feeder is stopped.

The final chip is suitable for heating in a boiler or fireplace, soil fixing and possibly for other purposes. The chip is asymmetrical and airy, so beautifully swells, does not mould and its calorific value is very high.

PIRBA LONGA WITH BLOWING

SP/TRA/04

Technical parameters

● Length	1 850 mm
● Width	1 500 mm
● Height	1 650 mm
● Weight	300 kg
● Cutting mechanism	two-way auger
● Maximal crushed material diameter	max 10 cm
● Chip length (not adjustable)	log length 17 cm
● Power	7 m ³ /hour
● Wood chips output	Output blow
● Emergency brake	Yes
● Tractor power from	20 kW
● Cardan RPM	540 - 1000 RMP
● Hinge type	I a II - as specified by the customer
●	

Machine equipment is designed for crushing branches, wood and wood waste, using two-way self-feeding cutting screw. The screw is supported by the support bearing, which prevents its offset. The machine has automatic feeder and all functions are turned on mechanically. Required tractor power from 20 kW and more. The wood chipper takes branches with leaves, needles, branched, dry, wet, and takes also boards and beams.

Connection to the three-point hitch of the tractor / small tractor by customer's specifications. When crushing the branches are inserted from behind the tractor and chips are blown to the side. The chip is blown by the chimney to the ground or to the crate. Into the bag by chimney(accessory).

The receiving hopper for inserting of branches is equipped with safety brake. When it is pressed, the brake is stucked into the inserted material and the feeder is stopped.

The final chip is suitable for heating in a boiler or fireplace, soil fixing and possibly for other purposes. The chip is asymmetrical and airy, so beautifully swells, does not mould and its calorific value is very high.

PIRANA LONGA 14HP ON THE CHASSIS

SP/SPA/04

Technical parameters

● Length	3,5 m
● Width	1,5 m
● Height	1,5 mm
● Weight	380 kg
● Cutting mechanism	two-way auger
● Maximal crushed material diameter	max 7 cm
● Chip length (not adjustable)	log length 15 cm
● Power	2,5 m3/hour
● Chassis	Cart with large technical certificate
● Platform hinge	Yes - ISO 50
● Wood chips output	Without blowing
● Emergency brake	Yes
● Engine	Kohler CH 440
● Power	14HP - 3600 RPM
● Fuel	Natural 95 (petrol)
● Tank volume	7 litres

Machine equipment is designed for crushing branches, wood and wood waste, using two-way self-feeding cutting screw. The high performance of the machine is provided by the KOHLER petrol engine of 14Hp, which is by robust pulley geared to slow, to force. The machine has automatic feeder. The wood chipper takes branches with leaves, needles, branched, dry, wet, and takes also boards and beams.

The machine is on chassis with towing hitch connection with a large technical license and the possibility of granting a license plate. Homologations for road traffic. When crushed, the branches are inserted into the red hopper and the chips are blown to the ground or to the net bag that can be attached to the chipper.

The receiving hopper for inserting of branches is equipped with safety brake. When it is pressed, the brake is stucked into the inserted material and the feeder is stopped.

The final chip is suitable for heating in a boiler or fireplace, soil fixing and possibly for other purposes. The chip is asymmetrical and airy, so beautifully swells, does not mould and its calorific value is very high.

PIRANA LONGA WITH TROLLEY CONNECTION

SP/TRA/05

Machine equipment is designed for crushing branches, wood and wood waste, using two-way self-feeding cutting screw. The machine has automatic feeder and all functions are turned on mechanically. Required tractor power from 10 kW and more. The wood block chipper takes branches with leaves, needles, branched, dry, wet, and takes also boards and beams.

Technical parameters

● Length	2,5 m
● Width	1,75 m
● Height	1,35 m
● Weight	250 kg
● Cutting mechanism	two-way auger
● Maximal crushed material diameter	max. 7 cm
● Chip length (not adjustable)	Chip length 15 cm
● Power	5 m ³ /hour
● Wood chips output	Output blow
● Platform hinge	Yes
● Emergency brake	Yes
● Tractor power from	10 kW
● Cardan RPM	540 - 1000 RMP
● Hinge type	I a II - as specified by the customer
● the cardan shaft isn't inclusive	

Connection to the three-point hitch of the tractor according to customer's specifications. When crushing the branches are inserted from a side the tractor and chips are blown behind the tractor. The chip is blown by the chimney to the ground or to the crate. Into the bag by bagging chimney(accessory).

The final chip is suitable for heating in a boiler or fireplace, soil fixing and possibly for other purposes. The chip is asymmetrical and airy, so beautifully swells, does not mould and its calorific value is very high.

PIRANA LONGA 14HP WHEELS 410X160

SP/SPA/03

Technical parameters

● Length	x mm
● Width	x mm
● Height	x mm
● Weight	270 kg
● Cutting mechanism	two-way auger
● Maximal crushed material diameter	max 7 cm
● Chip length (not adjustable)	log length 15 cm
● Power	2,5 m3/hour
● Wood chips output	Without blowing
● Emergency brake	Yes
● Platform hinge	Yes - ISO 50
● Chassis	off-road arrow tyres 410x160
● Engine	Kohler CH 440
● Power	14HP - 3600 RPM
● Fuel	Natural 95 (petrol)
● Tank volume	7 l

Machine equipment is designed for crushing branches, wood and wood waste, using two-way self-feeding cutting screw. The high performance of the machine is provided by the KOHLER petrol engine of 14Hp, which is by robust pulley geared to slow, to force. The machine has automatic feeder. The wood chipper takes branches with leaves, needles, branched, dry, wet, and takes also boards and beams.

The machine is with off-road modification. Equipped with off-road wheels 410x160mm, with the towing hitch connection. When crushed, the branches are inserted into the red hopper and the chips are blown to the ground or to the net bag that can be attached to the chipper.

The receiving hopper for inserting of branches is equipped with safety brake. When it is pressed, the brake is stucked into the inserted material and the feeder is stopped.

The final chip is suitable for heating in a boiler or fireplace, soil fixing and possibly for other purposes. The chip is asymmetrical and airy, so beautifully swells, does not mould and its calorific value is very high.

PIRBA LONGA

SP/TRA/03

Machine equipment is designed for crushing branches, wood and wood waste, using two-way self-feeding cutting screw. The screw is supported by the support bearing, which prevents its offset. The machine has automatic feeder and all functions are turned on mechanically. Required tractor power from 20 kW and more. The wood chipper takes branches with leaves, needles, branched, dry, wet, and takes also boards and beams.

Technical parameters

● Length	1 850 mm
● Width	1 000 mm
● Height	900 mm
● Weight	225 kg
● Cutting mechanism	two-way auger
● Maximal crushed material diameter	max 10 cm
● Chip length (not adjustable)	log length 17 cm
● Power	7 m ³ /hour
● Wood chips output	Without blowing
● Emergency brake	Yes
● Tractor power from	20 kW
● Cardan RPM	540 - 1000 RMP
● Hinge type	I a II - as specified by the customer
●	

Connection to the three-point hitch of the tractor / small tractor by customer's choice. When crushing the branches are inserted from behind the tractor and chips are blown to the side on the ground or into the net bag (accessory) that can be attached to the chipper.

The receiving hopper for inserting of branches is equipped with safety brake. When it is pressed, the brake is stucked into the inserted material and the feeder is stopped.

The final chip is suitable for heating in a boiler or fireplace, soil fixing and possibly for other purposes. The chip is asymmetrical and airy, so beautifully swells, does not mould and its calorific value is very high.

PIRANA LONGA 14HP WHEELS 410X100

SP/SPA/02

Machine equipment is designed for crushing branches, wood and wood waste, using two-way self-feeding cutting screw. The high performance of the machine is provided by the KOHLER petrol engine of 14Hp, which is by robust pulley geared to slow, to force. The machine has automatic feeder. The wood chipper takes branches with leaves, needles, branched, dry, wet, and takes also boards and beams.

Technical parameters

● Length	x mm
● Width	x mm
● Height	x mm
● Weight	270 kg
● Cutting mechanism	two-way auger
● Maximal crushed material diameter	max 7 cm
● Chip length (not adjustable)	log length 15 cm
● Power	2,5 m3/hour
● Wood chips output	Without blowing
● Emergency brake	Yes
● Platform hinge	Yes - ISO 50
● Chassis	off-road tyres 410x100
● Engine	Kohler CH 440
● Power	14HP - 3600 RPM
● Fuel	Natural 95 (petrol)
● Tank volume	7 l

The machine is with off-road modification. Equipped with off-road wheels 410x160mm, with the towing hitch connection. When crushed, the branches are inserted into the red hopper and the chips are blown to the ground or to the net bag that can be attached to the chipper.

The receiving hopper for inserting of branches is equipped with safety brake. When it is pressed, the brake is stucked into the inserted material and the feeder is stopped.

The final chip is suitable for heating in a boiler or fireplace, soil fixing and possibly for other purposes. The chip is asymmetrical and airy, so beautifully swells, does not mould and its calorific value is very high.

PIRANA LONGA 14HP

SP/SPA/01

Machine equipment is designed for crushing branches, wood and wood waste, using two-way self-feeding cutting screw. The high performance of the machine is provided by the KOHLER petrol engine of 14Hp, which is by robust pulley geared to slow, to force. The machine has automatic feeder. The wood chipper takes branches with leaves, needles, branched, dry, wet, and takes also boards and beams.

Technical parameters

● Length	2,1 m
● Width	1,3 m
● Height	1,2 m
● Weight	285 kg
● Cutting mechanism	two-way auger
● Maximal crushed material diameter	max 7 cm
● Chip length (not adjustable)	log length 15 cm
● Power	2,5 m3/hour
● Wood chips output	Without blowing
● Emergency brake	Yes
● Engine	Kohler CH 440
● Power	14HP - 3600 RPM
● Fuel	Natural 95 (petrol)
● Tank volume	7 l
● Chassis	for manual movement

The machine is without off-road modification and is designed for manual movement on a foamed surface such as paving, garden, dry meadow. When crushed, the branches are inserted into the red hopper and the chips are blown to the ground or to the rash bag that can be attached to the chipper.

The receiving hopper for inserting of branches is equipped with safety brake. When it is pressed, the brake is stucked into the inserted material and the feeder is stopped.

The final chip is suitable for heating in a boiler or fireplace, soil fixing and possibly for other purposes. The chip is asymmetrical and airy, so beautifully swells, does not mould and its calorific value is very high.

PIRANA LONGA WITH BLOWING

SP/TRA/02

Technical parameters

● Length	1 780 mm
● Width	1 120 mm
● Height	1 650 mm
● Weight	250 kg
● Cutting mechanism	two-way auger
● Maximal crushed material diameter	max 7 cm
● Chip length (not adjustable)	log length 15 cm
● Power	5 m3/hour

●	

Machine equipment is designed for crushing branches, wood and wood waste, using two-way self-feeding cutting screw. The screw is supported by the support bearing, which prevents its offset. The machine has automatic feeder all functions are turned on mechanically. Required tractor power from 20 kW and more. The wood chipper takes branches with leaves, needles, branched, dry, wet, and takes also boards and beams.

Connection to the three-point hitch of the tractor according to customer's specifications. When crushing the branches are inserted from behind the tractor and chips are blown to the side. The chip is blown by the chimney to the ground or to the crate. Into the bag by chimney(accessory).

The receiving hopper for inserting of branches is equipped with safety brake. When it is pressed, the brake is stucked into the inserted material and the feeder is stopped.

The final chip is suitable for heating in a boiler or fireplace, soil fixing and possibly for other purposes. The chip is asymmetrical and airy, so beautifully swells, does not mould and its calorific value is very high.

PIRANA LONGA 4KW

SP/ELE/01

Machine equipment is designed for crushing branches, wood and wood waste, using two-way self-feeding cutting screw. The screw is supported by the support bearing, which prevents its offset. The high performance of the machine is provided by the electric engine of 4KW, which is by robust pulley geared to slow, to force. The machine has automatic feeder. The wood chipper takes branches with leaves, needles, branched, dry, wet, and takes also boards and beams.

Technical parameters

● Length	1 750 mm
● Width	600 mm
● Height	900 mm
● Weight	200 kg
● Cutting mechanism	two-way auger
● Maximal crushed material diameter	max 7 cm
● Chip length (not adjustable)	log length 15 cm
● Wood chips output	Without blowing
● Power	2 m3/hour
● Emergency brake	Yes
● Chassis	for manual movement
● El. engine	4kW /3000 RPM

The machine is without off-road modification and is designed for manual movement on a foamed surface such as paving, garden, dry meadow. When crushed, the branches are inserted into the red hopper and the chips are blown to the ground or to the rash bag that can be attached to the chipper.

The receiving hopper for inserting of branches is equipped with safety brake. When it is pressed, the brake is stucked into the inserted material and the feeder is stopped.

The final chip is suitable for heating in a boiler or fireplace, soil fixing and possibly for other purposes. The chip is asymmetrical and airy, so beautifully swells, does not mould and its calorific value is very high.
