MURENA 38HP

DR/SPA/01

Machine for crushing branches, waste and wood waste. Crushing of the material is done by three knives screwed onto the flywheel of the machine. There are two feeding rollers. The machine is equipped with its own hydraulic circuit and is powered by the KOHLER ECH980 petrol engine of 38Hp(28,3kW). The feedrate can be controlled, which also adjusts the size - the length of the chips. The crusher takes branches with leaves, needle, branched, dry, wet and takes boards and beams.

Technical parameters

● Length	3,5 m
● Width	1,5 m
● Height	2,5 m
● Weight	620 kg
● Cutting mechanism	knife cutting-head
● Cutting knives	3pcs.
● Oposite blades	1pc.
● Feeding cylinders	2pcs.
● Maximal crushed material diameter	max 100 mm
● Maximal crushed material dimension	100x90 mm
● Chip length (adjustable)	chip length 5-10 mm
● Power	5 m3/hour
● Shift (adjustable)	Approx 0,3m/s
● Wood chips output	Output blow
● Emergency brake	Yes
● Chassis	Cart with large technical certificate
● Tractor hydraulics link-up	as specified by the customer

The crusher is on a chassis with trailer attachment with a large technical license and the possibility of assigning a license plate. Homologations for road traffic. When crushing, the branches are inserted from the back of the tractor and the chips are blown into the free space. The chip is blown out of the adjustable chimney in the range of 360°.

The resulting chips are suitable for heating in boilers with screw feeders, mulching, composting, pressing.

MURENA WITH CONNECTION OF TROLLEY

DR/TRA/02

Technical parameters

● Length	1 400 mm
● Width	1 500 mm
● Height	1 900 mm
● Weight	450 kg
● Cutting knives	3pcs.
● Oposite blades	1pc.
● Maximal crushed material diameter	max 100 mm
● Chip length (adjustable)	chip length 5-10 mm
● Power	5 m3/hour
● Shift (adjustable)	Approx 0,3m/s
● Emergency brake	Yes
● Tractor power from	20 kW
● Cardan RPM	540 - 1000 RMP
● Hinge type	II - as specified by the customer
●	

Machine for crushing branches, waste and wood waste. Crushing of the material is done by three knives screwed onto the flywheel of the machine. There are two feeding rollers connected to the tractor's hydraulic circuit. The feedrate can be controlled, which also adjusts the size - the length of the chips. Required tractor power from 20KW and more. The crusher takes branches with leaves, needle, branched, dry, wet and takes boards and beams.

Connection to the three-point hitch of the tractor according to customer's specifications. Possibility of connection the trolley to the tractor's lower hitch or directly behind the crusher. When crushing, the branches are inserted from the back of the tractor and the chips are blown into the free space. The chip is blown out of the adjustable chimney in the range of 360°.

The resulting chips are suitable for heating in boilers with screw feeders, mulching, composting, pressing.

MURENA WITH ELECTROMOTOR 11KW

DR/ELE/01

Machine for crushing branches, waste and wood waste. Crushing of the material is done by three knives screwed onto the flywheel of the machine. There are two feeding rollers. The machine is equipped with its own hydraulic circuit and is powered by high-performance 11 KW electric motor. The feedrate can be controlled, which also adjusts the size - the length of the chips. The crusher takes branches with leaves, needle, branched, dry, wet and takes boards and beams.

Technical parameters

● Length	1 600 mm
● Width	1 500 mm
● Height	1 900 mm
● Weight	550 kg
● Cutting mechanism	knife cutting-head
● Cutting knives	3pcs.
● Oposite blades	1pc.
● Feeding cylinders	2pcs.
● Maximal crushed material diameter	max 100 mm
● Maximal crushed material dimension	100x90 mm
● Chip length (adjustable)	chip length 5-10 mm
● Power	5 m3/hour
● Shift (adjustable)	Approx 0,3m/s
● Wood chips output	Output blow
● Emergency brake	Yes
● El. engine	11

The crusher is equipped with a suspension eye for relocation. When crushing, the branches are inserted from the back of the tractor and the chips are blown into the free space. The chip is blown out of the adjustable chimney in the range of 360°.

The resulting chips are suitable for heating in boilers with screw feeders, mulching, composting, pressing.
