G8 TWO-PIECE ANCHORING SYSTEM

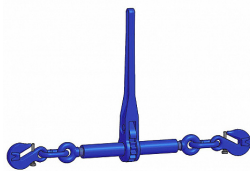

ROOT CHAINS

Suitable for anchoring heavy loads or machinery. The system consists of two parts. The ratchet tensioner, which has hooks at both ends, and the chain with 2 hooks with a connecting pin, which are fitted with a safety device to prevent unintentional unhooking. The shortening hook allows quick and easy adjustment of the chain length. The chain is normally supplied in black, but can be supplied in galvanised if required. As standard we supply a chain with a length of 3m.

Chain / pulling force: 6 mm / 2200 kg, 8 mm / 4000 kg, 10 mm / 6300 kg, 13 mm / 10 000kg

Lever: long lever, short lever

Chain length: 3 m

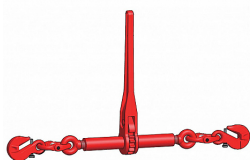

ANCHOR RATCHET G10 - LONG LEVER

ROOT CHAINS

Ratchet tensioner for anchor chains in the stronger G10 class. Ideal for clamping loads where the normal high strength G80 grade is not sufficient or where you want to use more clamping force while maintaining smaller chains and components. The ratchet tensioner is used as part of anchor chains to securely and safely anchor particularly heavy loads. The ratchet is equipped with shortening hooks at both ends for placement at any point on the chain. The shortening hooks are fitted with a safety lock to prevent the chain from accidentally falling out. The ratchet lever is long as standard, making clamping easier.

For chain: 8 mm, 10 mm, 13 mm

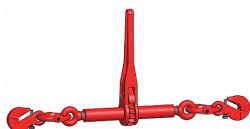

ANCHOR RATCHET G8 - LONG LEVER

ROOT CHAINS

Ratchet tensioner for anchor chains. The ratchet tensioner is used as a part of anchor chains to securely and safely anchor especially heavy loads. The ratchet is equipped with shortening hooks at both ends for positioning at any point on the chain. The shortening hooks are fitted with a safety lock to prevent the chain from accidentally falling out. The ratchet lever is longer, making clamping easier.

For chain: 8 mm, 10 mm, 13 mm

ANCHOR RATCHET G8 - SHORT LEVER

ROOT CHAINS

Ratchet tensioner for anchor chains. The ratchet tensioner is used as a part of anchor chains to securely and safely anchor especially heavy loads. The ratchet is equipped with shortening hooks at both ends for positioning at any point on the chain. The shortening hooks are fitted with a safety lock to prevent the chain from accidentally falling out. The ratchet lever is shorter, making it more compact, slightly lighter and less obstructive to handle.

For chain: 6 mm, 7/8 mm, 10 mm
